MASTER'S MESSAGE

This has been an incredibly fulfilling year as Master at Eusoff Hall. Beyond the wonder of homecoming back to my second home all my undergraduate years at NUS, and the robust support of colleagues in the Residential Life team here, what has impressed me most is the calibre of students that I have interacted with. Whether in sport, culture or community engagement, Eusoffians wowed me with their spirit and discipline, their confidence to aim high and to rise against the odds to achieve their goals.

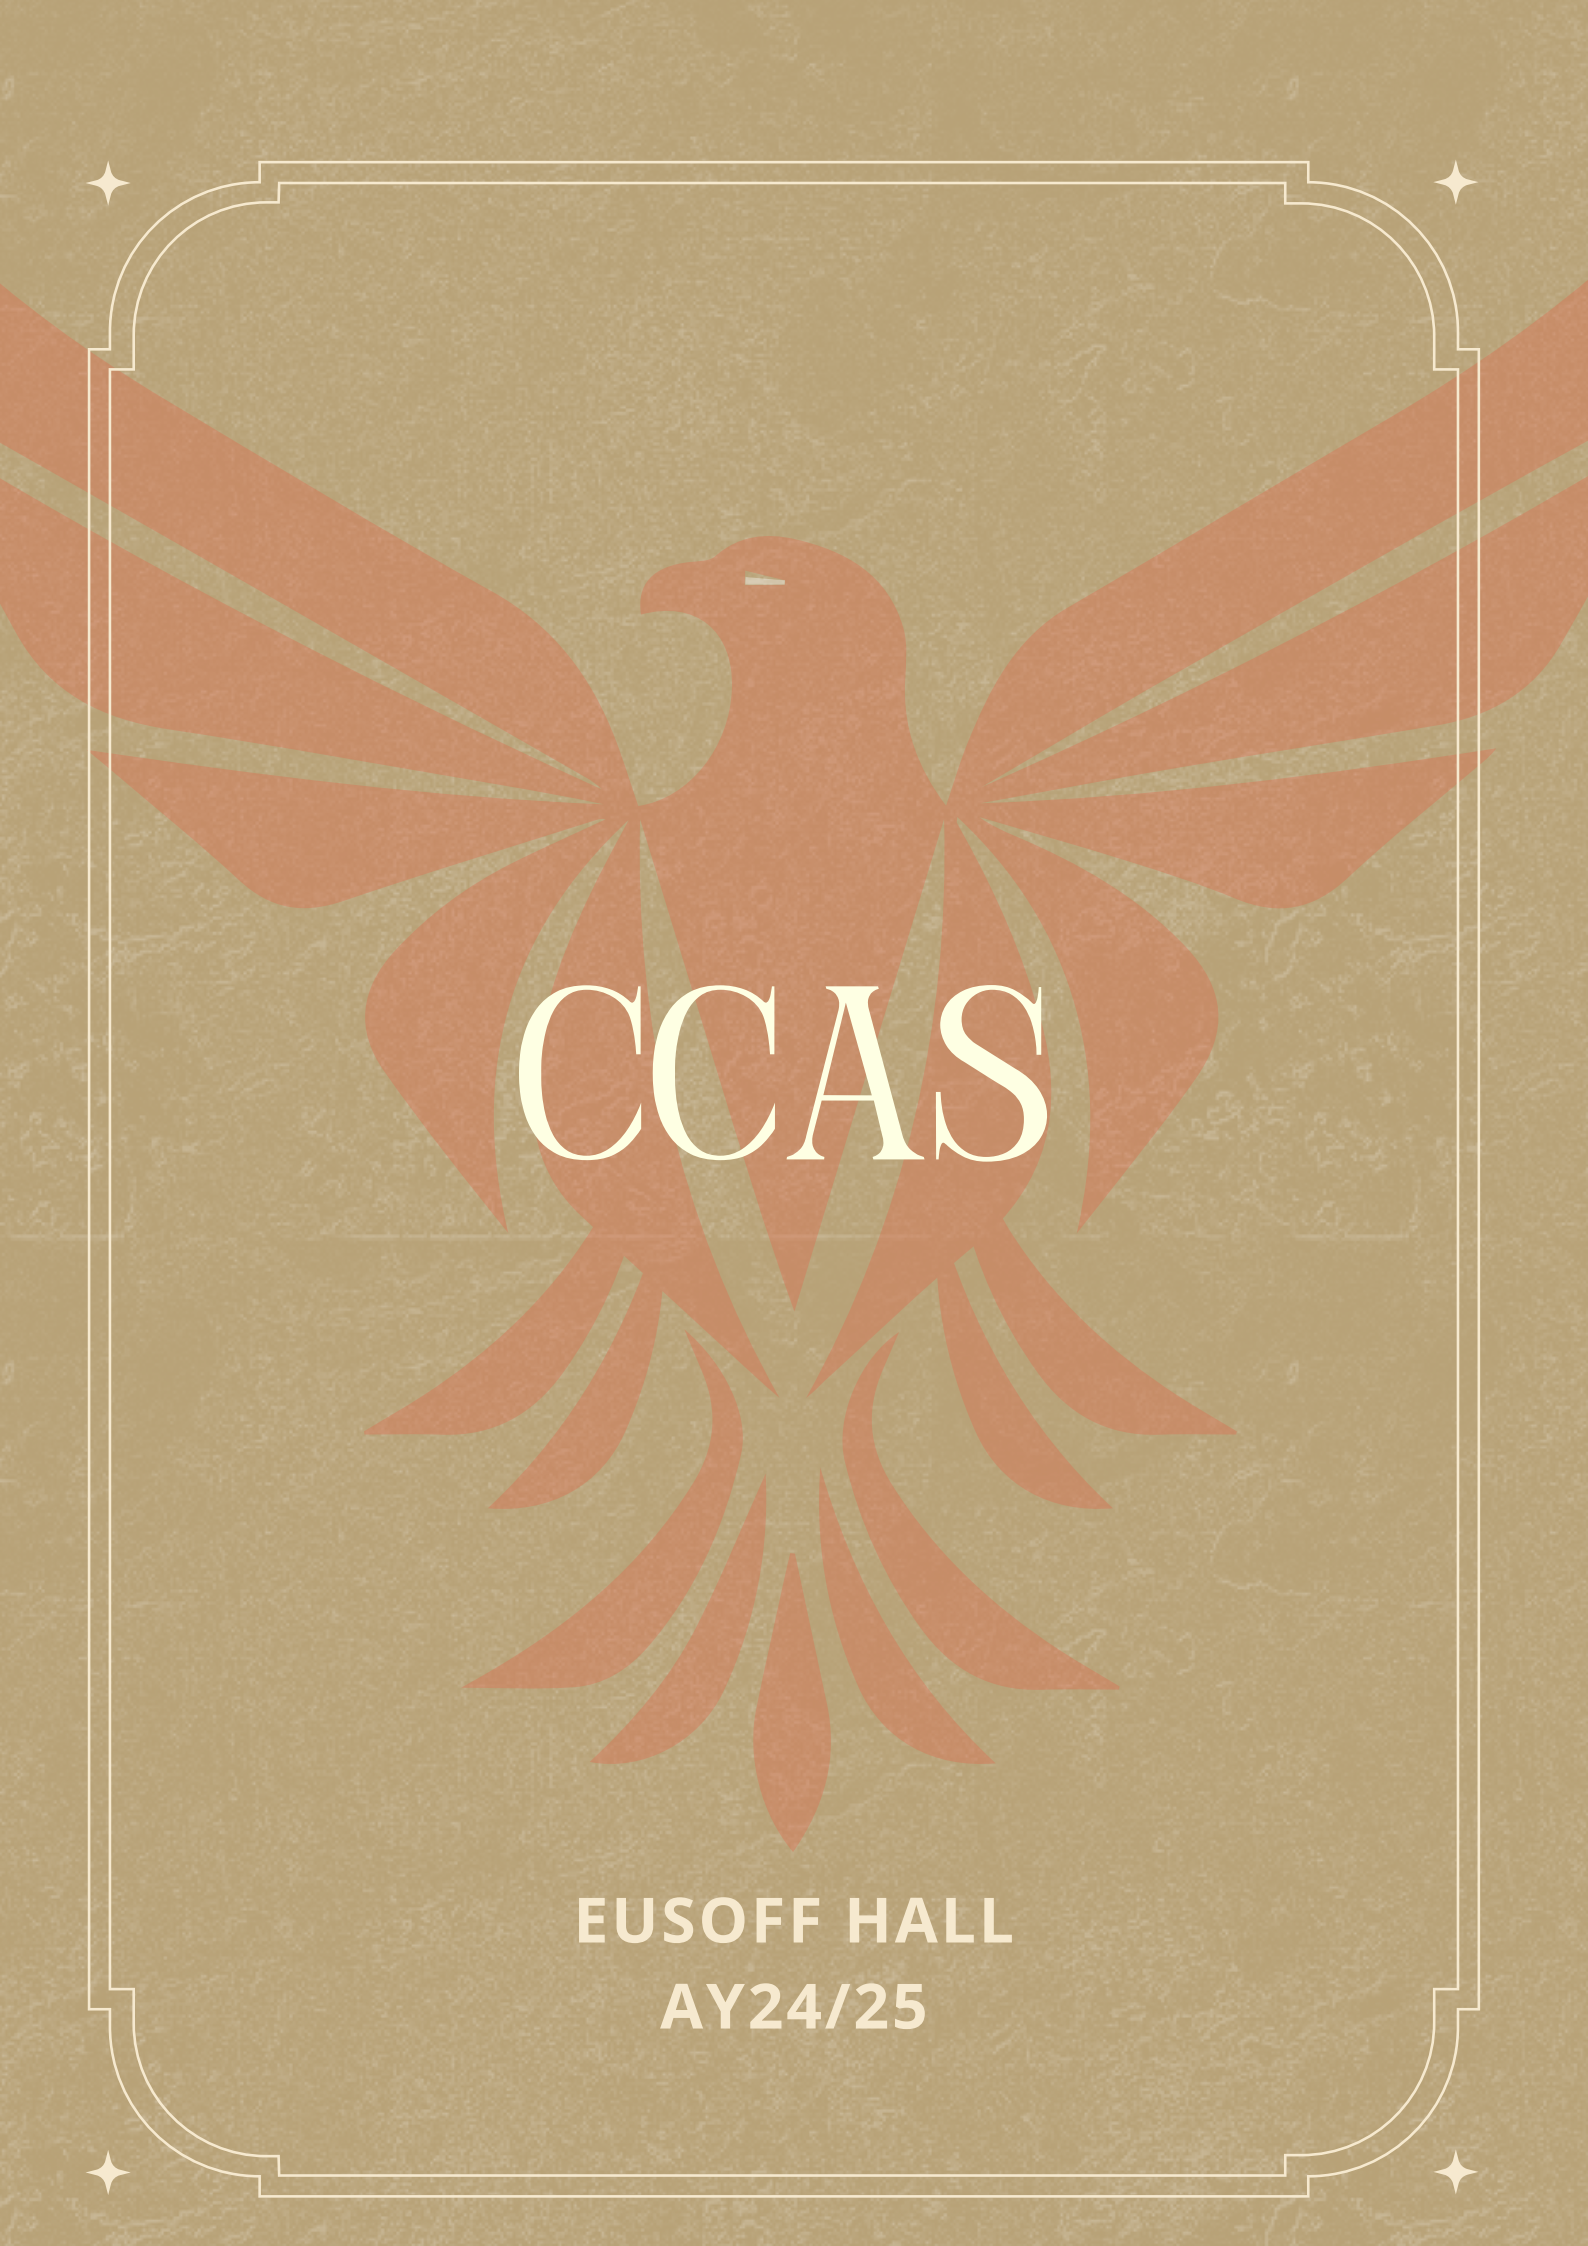

MASTER'S MESSAGE

It is a privilege to lead a hall with such students, together with a JCRC team of compelling leaders, and to witness students growing through experiences integral to hall life -- excelling and working hard in competitions, performances and activities that create positive social impact. And to see them enjoying themselves, eating, celebrating and studying together, and making friendships that I know will enable them to continue to thrive after they leave the grounds of the hall -- though they will always remain a valued member of our community, always a Eusoffian.

This volume captures the highlights of what we have experienced and gives a glimpse into our community, as well as what has brought me much joy this year. Thankful to our students for the part they have played in bringing Eusoff Hall to even greater heights.

ROAD RELAY M

Good job fellas! You guys put up a great fight that you guys look back on and be proud of, even long after you have left the hall. It has been incredibly heartening and inspiring to see you guys show up consistently for training and make small gains in your timings before giving it your best shot on race day itself. Stay in touch!

Khai Tjie

ROAD RELAY F

HI GIRLS!!

I want to thank all of you for your efforts this IHG, be it on the route itself during race day or the trainings leading up to it. If you came down consistently for trainings as well, extra big kudos to you for your persistence and effort despite other commitments you may have had, be it in academics or hall. I'm super proud of each and every one of you because I understand how daunting running the route can be! I would also like to thank Umaymah, my Vice-Captain, for working alongside me and jointly dealing with our annual crisis of fielding runners. I wish every one one of you the best in school and your sporting endeavours and I hope to see you guys around next AY! :D

community's journey, and universal. For the artist, it is a medium of internalization to step into another's perspective, to view the world through a different lens. This duality makes art a bridge between the individual and the collective, fostering understanding and connection. The artist's role is to innovate, to challenge, and to inspire. The relationship between art and technology is a testament to the resilience of the artistic community, and the importance of creativity. Artists continue to inspire, driven by a passion that transcends material boundaries. Virtual reality, artificial intelligence, and digital experiences are pushing the boundaries of what art can be, challenging traditional notions of ownership and ownership.
